About Us

It's great to be an Aussie, just ask the team at Metromax.

Metromax Sheds is a fully Australian operated company specialising in the supply of fully engineered kit steel building systems which cater to the requirements of the domestic, rural and commercial sectors.

We provide accurate quoting and precise installation plans, along with fully engineered working drawings for a range of portal and stud frame buildings in over 3000 innovative designs.

And because of our close association with one of Australia's largest manufacturers of steel shed components, we can quickly service our clients' needs through any of their 26 national distribution and manufacturing outlets.

All Metromax sheds come with our exclusive Steel Safe Warranty that gives the comfort of knowing the warranty is underwritten by all the material suppliers of products that are used in your Metromax building. That's total coverage.

Steel Safe Warranty not only covers the roof cladding, but also all structural members, fasteners, door items and all accessory items - in other words, the whole kit.

And you'll never be out of pocket because Steel Safe Warranty warrants that any defects within the warranty terms shall be replaced, promptly, at no charge.

Metromax has a free-call centre which allows clients to be assured that enquiries for pricing,

design and after-sales service can be attended to within a 24-hour period - anywhere across the nation.

Forget the paperwork hassles - leave it all up to us.

All you need to do is choose the design, size and colour scheme of the shed and we'll do the rest - we'll supply accurate competitive pricing, and, on acceptance of quotations, we will furnish fully engineered plans and documentation ready for lodgement with councils Australia wide. You don't have to lift a finger.
